SUMMARY

ISTQB-certified QA Engineer with 9+ years of experience testing web, mobile, and API-based SaaS applications across logistics, CMS, QMS, and design-led platforms. Specializing in building Playwright automation frameworks and integrating them into CI/CD pipelines. Currently leading test automation strategy, backend data-integrity validation, and regression execution for freight and logistics systems at 30KFT.

EXPERIENCE

30KFT

Aug 2025 – Present

Senior QA

Remote

- Designing and implementing a Python-based automation framework using Playwright, targeting core regression flows across logistics and freight management modules; managing codebase in GitHub with planned migration to Bitbucket.
- Lead regression validation across 5+ core logistics modules, ensuring zero critical defects escaped to production over 3 consecutive release cycles.
- Identified a shared-library data-integrity defect (HandlesConflictCheck) affecting 4 backend microservices (core, container, general, warehouse), uncovering root cause down to a specific uniqueness-check trait blocking live user edits.
- Uncovered a cross-product account-security defect in YardTracker password reset workflows that either failed to issue reset links or altered incorrect cross-platform credentials, preventing production security risks.
- Led regression validation across the Rates module in collaboration with Integrations QA, surfacing 3+ data-integrity defects in dated/scheduled rate handling (stale DB records, timeline gaps) and ensuring Income/Expense rate pair synchronization.
- Discovered client-facing invoice rounding discrepancies between PDF outputs and financial report totals, securing financial data accuracy across billing modules.
- Perform SQL-based backend validations to verify rate versioning, effective-dated records, and historical data integrity within pricing workflows.
- Validate REST APIs and backend business logic, analyzing request/response payloads across 40+ integrated endpoints.
- Investigate, document, and manage defects using Jira, collaborating with developers to diagnose root causes and ensure successful retesting.

Freelance QE/QA

Aug 2024 – Aug 2025

Quality Assurance Engineer

Remote

- Built an automated test suite of 150+ scripts for a learning platform using Playwright, reducing manual regression time by ~60%.
- Integrated Playwright execution pipelines in Jenkins for continuous testing and automated reporting across environments.
- Performed QA for a Drupal CMS migration, validating functional and data integrity across 200+ content pages.
- Conducted manual and regression testing for a QMS and Online Learning Platform.
- Performed API testing, load testing with JMeter, and re-tested penetration findings using Burp Suite.
- Created and maintained test cases and documentation, tracking 100+ defects through resolution in JIRA.

Infor

Nov 2018 – Aug 2024

Quality Assurance Analyst

Manila, Philippines

- Developed and deployed 200+ automation test scripts for unit and UI testing using Playwright, covering design components and homepage widgets.
- Performed regression, smoke, cross-browser, and accessibility testing for design system components, CRM mobile apps, and homepage widgets.
- Created and maintained test cases and BDD scenarios using Gherkin, tracking defects in GitHub and JIRA across 20+ sprint cycles.
- Participated in Sprint Planning, Test Planning, Retrospectives, and Daily Stand-ups within Agile workflows.
- Validated UI implementations against Figma designs, ensuring pixel-perfect accuracy across responsive layouts.

Accenture

Nov 2017 – Nov 2018

Salesforce Consultant / QA

Manila, Philippines

- Conducted manual QA testing on Salesforce Community Cloud and Sales Cloud workflows including user registration, permissions, and workflow validation.
- Performed end-to-end QA from UAT to production, resolving defects and ensuring system quality across releases.
- Deployed and tested changes in QA environments using Change Sets and Git integration.

Capgemini

Jan 2015 – Nov 2017

Quality Assurance / Software Engineer

Manila, Philippines

- Conducted functional, integration, regression, and ad-hoc testing for payment method modules across Salesforce Banking POC and Accelerator projects.
- Logged and managed defects in JIRA, collaborating with third-party teams to address API changes.
- Prepared UAT checklists and facilitated demos to ensure stakeholder alignment and production readiness.

SKILLS

Automation	Playwright, Selenium, Cucumber/Gherkin, BDD, Jenkins
API & Performance	Postman, JMeter, Burp Suite, REST API Validation
Languages	Python, JavaScript, TypeScript, SQL, SOQL
Tools	JIRA, GitHub, Bitbucket, Git, VSCode, BrowserStack, Figma, Salesforce
Testing	Functional, Regression, Smoke, Cross-browser, Accessibility, Load, Performance, UAT
Methods	Agile (Scrum), Waterfall, Test Planning, Defect Tracking, Test Documentation

CERTIFICATIONS

ISTQB-BCS Certified Tester Foundation Level | Certification No. 00325339 | Feb 2017

EDUCATION

Mapua University | Bachelor of Science in Information Technology | 2011–2015 | Manila, Philippines
